

The AIL Code of Ethics

All members of the AIL by acceptance and continuance therein, shall be deemed to have subscribed to the following Code of Ethics:

That the dignity of our chosen profession may be perpetuated, it is the duty of all members of the AIL:

To practice their profession in the spirit of fairness to their institution, with fidelity to security in conformance with appropriateness, and with high ideals of personal honor;

To properly and impartially analyze security problems, and to advance the best possible solution for the protection of their institution;

To conduct themselves in a professional, dignified manner;

To abide by applicable licensing, regulations, laws, and life safety and building codes;

To refrain from using their professional skills, training, or expertise in a manner that compromises the safety or security of their institution or the general public;

To refrain from associating themselves with, or allowing the use of their names by, any enterprise of questionable character, or in any manner countenancing misrepresentation;

To cooperate in advancing the best interest of the locksmithing industry by interchange of technical information and experience with fellow locksmiths, security professionals and law enforcement;

To encourage and promote loyalty to the profession, always ready to apply their technical knowledge, skill and training for the use and betterment of our industry;

To comply to the ALOA Code of Ethics whenever performing locksmith and security services commercially.

ALOA Institutional Locksmiths
We're Stronger Together.

Come Together.

No matter your job title or which department you work in — maintenance, security, public safety, buildings and grounds, facilities management, and so on — you have a wide variety of locksmith-related responsibilities.

You handle everything from locks, master key systems, key cutting and key control to CCTV, door checks, computer systems, ADA compliance and recommendations for life safety and security hardware.

And up until now, you've mostly had to handle everything on your own.

Not anymore. With ALOA Institutional Locksmiths (AIL), you're not alone.

With tens of thousands of institutional locksmiths working throughout the country, we're in a unique position to work together. We don't compete against each other. We don't even have customers, at least not in the traditional sense of the word. This means we can exchange ideas and information. It means we can share solutions and assist each other in locating hard-to-find items. It means we can work together.

And it's exactly why ALOA SPAI formed AIL, a division that's tailored to meet the unique occupational needs of in-house locksmiths working for educational facilities, hospitals, hotels, government agencies and other types of institutions.

Led by John Truempy, CMIL, CRL, IFDI, who has more than a quarter century of experience as an institutional locksmith, AIL offers:

- Affordable, year-round training
- Industry certification
- Networking opportunities
- Online education
- Computer-based testing
- And much more.

World-Class Resources

As a member of AIL, you'll have access to the industry's premier education opportunities, including in-person and online classes designed with the advanced needs of institutional locksmiths in mind.

You'll have access to many other resources, including:

- Information for developing key control policies and hardware standards
- Events and networking opportunities exclusively for institutional locksmiths
- Additional member benefits that can help your institution in terms of security, safety and cost savings

With former institutional locksmith Tom Demont at the helm as president, ALOA SPAI has made a commitment to add even more resources to the AIL division in the months and years ahead — the resources you need to help your institution become a safer, stronger and more secure facility.

That's Strong. That's AIL Strong.
